2020-2025
A FIVE-YEAR LOOK-AHEAD AND THE PATH TOWARD OUR PREFERRED FUTURE
Chancellor’s Introduction

I’d like to thank all the people for your participation in our strategic planning process. Faculty, staff, students, and community members took part in helping us craft a plan that will guide Washington State University Tri-Cities over the next five years and beyond. The resulting plan will help us determine our priorities, including budgeting, and act as a bellwether for imagining and bringing to fruition our desired future.

There are challenges on the path ahead. As I write this, I am at home under the “Stay Home, Stay Healthy” order in Washington state due to the COVID-19 pandemic. There will be long-term ramifications from this crisis for higher education. In addition, the campus is still operating at a deficit. Our research tells us, however, that demand for higher education will remain strong in our region. We will scale-up to serve the needs of a diverse and fast-growing population, address the local degree gap and accommodate the needs of a rapidly diversifying industry base. We will focus on our strengths in research and continue to grow around key areas.

We will need to adjust along the way. Because of that, we have adopted a continuous improvement model for our strategic plan. As a campus and community, we will monitor our progress, hold each other accountable, reevaluate our environment annually, and more often if necessary, make appropriate adjustments as we go. In this way, we will maintain a relevant five-year look ahead period.

I want to give a special thank you to the many members of our planning teams. A big thank you to our leaders Sarah Tragesser, Ray White, and John Mancinelli, who skillfully guided us through this process. They received support from the other members of the steering committee, Kate McAteer; Zach Harper, and Paul Carlisle. They were joined by the planning team, Eadie Balint, Christopher Cree, Patrick Jensen, Brian Morena, Mohamed Osman, Anna Plemons, Jordyn Creighton, Maegan Murray, and Oscar Carrillo, all of whom, volunteered many hours to sift through data and help set the objectives. Their work was augmented by input from our strategic advisors, Naidu Rayapati, Manuel Garcia-Perez, Joan Giese, Michael Mays, Farion Williams, Thomas Henick-Kling, Christine Portfors, and Vicki Gordon. We had a great mix of faculty, staff, and community members, and their commitment, authentic engagement, and thoughtful discourse has driven this ambitious project to its successful completion.

Throughout this process, and the planning documents it has produced, a bright future is envisioned for WSU Tri-Cities. We have so much to be proud of and we will do what it takes to enhance a sense of pride in what we do right here as the only public land-grant, RT university in the region. We are a valuable part of the Washington State University system and have much to contribute to the Drive to 25. We know we have what it takes. Working together, we will create our preferred future.

GO COUGS!

Washington State University acknowledges that its locations statewide are located on the ancestral homelands of the Native peoples, who have lived on these lands from time immemorial. As such, the University expresses its deepest respect and gratitude to our indigenous neighbors, for their everlasting care and protection of our shared lands and waterways. We pledge as a University community to recognize, respect, and honor this history in perpetuity. In pursuing this path, we continue to open ourselves to ever greater inclusion of Native peoples and world views as we pursue understanding and achievement of a more equitable society for all.

Acknowledgement of America’s First Peoples
A Continuous Improvement Process

WSU Tri-Cities has adopted the Society for College and University Planning (SCUP) continuous improvement model. This integrated planning approach considers both internal and external factors and aligns planning both vertically and horizontally to:

- a. Gain an accurate picture of our environment
- b. Ask hard, but necessary, questions
- c. Build actionable plans

This Model at Tri-Cities

At WSU Tri-Cities, the chancellor leads the iterative planning effort as the executive sponsor, providing guidance for faculty co-chairs and planning teams at each phase of development.

**Phase I** - A small steering committee did the preliminary “planning to plan” work, conducting internal and external environmental scanning, focus groups, town halls and preliminary surveys. They also prepared the Baseline Study - an inventory and analysis of the institution’s environment key functional areas. Through this work, three common values and six distinct themes were identified.

The overarching values of distinctiveness, relevance and inclusiveness were integral in all of our conversations and are woven throughout this document. Within this environment, six broad strategic themes emerged, which were refined into our strategic goals.

**Phase II** – A strategic planning team studied the data and developed broad goals for each of the strategic themes. Team members (20+) represent faculty, staff, students and community partners. Through a series of workshops and presentations, they synthesized and prioritized the collected information. Broad goals were crafted to be our institutional priorities for the next five years.

**Phase III** - A planning support team develops strategic objectives for accomplishing our goals. They also work with academic and operational units to identify the specific strategies and metrics to track in each area. This standing committee is charged with supporting, tracking and reporting toward strategic goals. They also facilitate the annual refresh of the rolling five-year strategic plan.

Five-Year Rolling Plan

Unique to WSU Tri-Cities is an implementation process that reviews and rewrites the plan annually through an inclusive and transparent planning process. It is a rolling five-year look-ahead that is monitored and reviewed each year. This strategic planning process leads directly into the local budgeting process at WSU Tri-Cities, thereby informing critical resource allocation.

Outlook and Environment

Conducting a thorough environmental scan, our planning teams considered relevant trends affecting higher education from five lenses: social, technological, economic, environmental and political (STEEP analysis). Fifteen trends were prioritized for the WSU Tri-Cities campus to address in this five-year plan. In addition, the local economic, demographic and political environments were analyzed and yielded important data and insights about the continuing demand.

**Economic Trends and Forecasting**

<table>
<thead>
<tr>
<th>Population will grow</th>
<th>Strong demand for baccalaureate degrees</th>
<th>Overall population getting younger</th>
</tr>
</thead>
<tbody>
<tr>
<td>350,000 population in next 10 years</td>
<td>56% of local job postings expect a bachelor’s degree</td>
<td>WSU Tri-Cities pipeline of students is shifting</td>
</tr>
<tr>
<td></td>
<td>36% of people ages 25-64 hold a bachelor’s degree or higher</td>
<td>Number of youth in Pasco and Kennewick is increasing</td>
</tr>
</tbody>
</table>

**Diversification of regional industries drawing tertiary industries**

| Current regional industries: agriculture, healthcare, energy, science, education, and technology | Drawing industries: hospitality services, distribution, information centers and community services | Number of youth in Richland is decreasing |
| Must address weak enrollment and build a stable undergraduate base | Presents a large deficit of work-prepared employees | Number of four-year students select to attend a four-year university |

The Benton-Franklin Economic Trends data suggests that WSU Tri-Cities will need to explore strategies that engage adult learners and high school graduates differently. There will be significant growth and shifts to the workforce demands that will require WSU Tri-Cities to adapt. While the strength of liberal arts education, WSU Tri-Cities’ ability to develop critical thinkers that learn and adapt are what industry demands. The question is, now how may this be accomplished?

Fifteen trends affecting WSU Tri-Cities in the next 5 years

<table>
<thead>
<tr>
<th>Social</th>
<th>Technological</th>
<th>Economic</th>
<th>Environmental</th>
<th>Political</th>
</tr>
</thead>
<tbody>
<tr>
<td>Less value placed on traditional higher education</td>
<td>Need for robust wrap-around services supporting first-generation, minority, and LGBTQ</td>
<td>Affordability will be critical as access to the cost to deliver education rises</td>
<td>Redesign learning spaces and creative spaces</td>
<td>Legislative focus and funding moving away from liberal arts education toward job skills</td>
</tr>
<tr>
<td>Keep pace / staying current (funding, support, etc.)</td>
<td>Preparing students for 21st century careers</td>
<td>Fully connected digital workplace and personal environments</td>
<td>Shifting demographics and increased diversity of all kinds</td>
<td>Must address weak enrollment and build a stable undergraduate base</td>
</tr>
<tr>
<td>Physical campus (buildings and infrastructure): maintain/renovate/replace</td>
<td>Increasing awareness, regulations and commitment for environmental sustainability</td>
<td>Shifting state politics and resulting funding priorities</td>
<td>State support for higher education not recovering from pre-recession levels, pushing costs to students</td>
<td>Social impact of education enrollment decline of 17% annually.</td>
</tr>
</tbody>
</table>

The improved economy and the ability for students to enter well-paying jobs contribute to the decrease of enrollment in both community and technical college and four-year institutions, matching the national higher-education enrollment decline of 17% annually.
Strategic Goals

Goal One | Regional and Community Engagement

Goal Two | Institutional Effectiveness

Goal Three | Research & Scholarship

Goal Four | Student Success

Goal Five | Campus Culture & Environment

Goal Six | Accessibility and Equity

Goal One
Regional and Community Engagement

Demonstrate our value to the community and leverage the distinctiveness of the region through engagement by students, faculty, and staff.

Objectives

1. Make campus expertise available to the broader community by serving as a steward of resources, knowledge and history and as a center/hub for lifelong learning.

2. Enhance visible and reciprocal partnerships that put WSU Tri-Cities at the center of community leadership.

3. Develop and grow community relationships to advance the land-grant mission via engagement and philanthropy.

Our preferred future...

The people and organizations of the mid-Columbia region regularly utilize the resources of our campus (talent, knowledge, data, facilities and equipment) to advance community interests and better understand our region. WSU Tri-Cities holds a reputation for serving community needs and integrating students and research with community partners. Community leaders value our work, actively partner for strategic opportunities and support our cause. Our students, faculty and staff are embedded in and contribute to local initiatives that help our communities and serve our WSU mission to advance, extend and apply knowledge.
Goal Two
Institutional Effectiveness

Prioritize the strategic and efficient stewardship of resources.

Objectives

1. Establish and maintain sustainable operations and mechanisms for generating critical resources for growth.

2. Create processes that are transparent, consistent, and inclusive of the campus community and the WSU system.

3. Refine and establish processes and procedures to promote a culture of accountability, efficiency and growth.

Our preferred future...

Resources are managed through a comprehensive annual process that engages the entire campus community. Campus core operations are fully supported by the revenue they generate. New initiatives, selected through the annual planning process, are tied directly to strategic initiatives. Funding is clearly identified and tied to the performance of these programs and reevaluated annually. Each unit tracks key performance indicators that contribute to our culture of planning, accountability and data-informed decision making.

Goal Three
Research & Scholarship

Elevate research and creative work as a public land-grant, R1 WSU institution.

Objectives

1. Leverage WSU’s R1 status, the Washington State University system, its assets and brand to enhance and grow a scholarship identity unique to the mid-Columbia region.

2. Capitalize on campus core competencies, strengths, and community resources to distinguish key programs as world-class centers for research.

3. Expand creative and accessible research opportunities for faculty and students.

Our preferred future...

WSU Tri-Cities is known as a center for research excellence in signature areas of science with national and global reach. The world views WSU Tri-Cities as an engine for cutting-edge research and scholarship that capitalizes on our local and regional strengths. We are further known for our unique model of engaging undergraduate students in meaningful research and providing opportunities to contribute to our world through local and regional partnerships.
Goal Four
Student Success

Foster an inclusive environment supporting academic achievement and comprehensive student success.

Objectives

1. Promote civic engagement to prepare students for participation in a diverse democratic and global society.
2. Create a safe and welcoming learning environment for all students.
3. Support a holistic approach for academic success

Our preferred future...

WSU Tri-Cities students report a strong sense of belonging, multiple and relevant pathways for student success and an environment of support through academic achievement and education in their career life-cycle. A holistic approach (academic, co-curricular learning, student development, career and civic engagement) fosters the student experience and cultivates an inclusive environment.

Goal Five
Campus Culture & Environment

Provide a vibrant culture of pride and an inclusive environment that promotes both collective and personal achievement.

Objectives

1. Maintain a workplace where employees feel safe, acknowledged, and able to do their best to achieve professional objectives.
2. Create robust student life experiences and encourage the participation of all.
3. Build pride in the WSU Tri-Cities brand and actively support “lifelong Cougs” within our community.

Our preferred future...

WSU Tri-Cities is home to a culturally-diverse population of students, staff, and faculty. The distinction of being a Tri-Cities Coug brings a sense of pride and comradery to our students, alumni and community. Faculty and staff are invested in the strategic direction of the campus and are proud of their affiliation with WSU Tri-Cities. The work environment supports individuals to pursue professional goals and achieve their potential. An overall inclusive environment connects individuals in meaningful ways, fostering a sense of belonging for all.
Goal Six
Accessibility and Equity

Promote access to and inclusivity within the campus community.

Objectives

1. Reduce barriers to academic access, degree completion, and continuing education across the education and career life-cycles.
2. Provide support for students and employees to promote enhanced engagement, access, and representation.
3. Maintain an inclusive campus design that promotes and encourages an inclusive and equitable learning environment.

Our preferred future...

Students in the mid-Columbia region see WSU Tri-Cities as their first choice and their most affordable, four-year degree option. Staff are well-known for reducing barriers and accommodating each student’s unique needs. They are experts in reaching underserved and underrepresented populations and maximizing access to high-quality education, regardless of physical, socioeconomic, or geographic limitations. Flexible scheduling, robust support services and affordable options for attendance present the best opportunities for student success.
