

# Kasey Schertenleib

*Voiland College Student Services  
Manager for Undergraduate Programs*

Schertenleib “is the linchpin that holds together operations in and around student services in the Voiland College,” wrote his nominators. He is deeply committed to students and has an unflappable and calm disposition that students, his fellow staff, and the faculty and administrators who interact with him deeply appreciate.

Among his many responsibilities, he coordinates 12 Voiland College advisors and advises 80 undecided engineering and engineering/computer science students. He is the primary coordinator for Voiland College at Alive! Orientation advising days and coordinates on-campus recruiting efforts.

He is known for being meticulous, thorough, thoughtful, and quietly energetic with a keen sense of humor. Schertenleib is also an integral part of the first impression the college makes on prospective students.

As one student who met him as a high school student wrote, “I can honestly say that I may not have even attended WSU if it weren’t for Mr. Schertenleib. His understanding ... was something that I found at no other engineering college and his warmth and kindness to me those first days heavily influenced my choice to attend WSU.
