

# Ryan Summers

*Computer Engineering and German*

Ryan Summers is from Stanwood, Washington. Recently named a distinguished Goldwater scholar, he serves as an embedded systems intern for Hanshaw Virtual University creating hardware, software, and firmware for embedded systems programming platforms.

As an avionics firmware intern for Space X in summer of 2016, he developed Crew Drag spacecraft emergency abort systems.

He has served for the past three years as president of RoboSub Club, where he has theorized and designed the submarine electrical subsystem.

Summers plans on earning his doctorate degree in computer science and conducting research in machine learning, artificial intelligence, and autonomous systems.
